Sailing Instructions

Amendment 1

Published 15 October 2024 at 1400

SI 10.1.1 is replaced with the following:

10.1.1 IMPORTANT INFORMATIONAL NOTE: [NP][DP] The YB system uses a geofenced area, rather than the finish line, to identify a “finish time.” This geofence extends south of the finishing marks, in a triangular pattern. Therefore, it is possible that a boat could sail into the geofence from the East or West, without actually sailing through the finish line in the correct direction (North to South). Receiving a notification from the YB online tracker that the boat has received a finishing time does not necessarily mean the boat has *finished*.
